

TALINO AI

PRO | ELITE | ULTRA | MAX

NO CLOUD. NO LIMITS.

Unleash Local AI Power—Without Compromise

TALINO AI delivers the speed, security, and configurability that today's AI professionals demand.

- 100% Local Processing – No Cloud Dependency
- Built for AI, ML & LLM Training – Ready Out of the Box
- Fully Custom Configured – No Locked-In Specs
- Trusted by Government, Military, and Global Enterprises

Build Your **TALINO** Today at **SUMURI.COM**

Specs	TALINO AI Workstation PRO	TALINO AI Workstation ELITE	TALINO AI Workstation ULTRA	TALINO AI Workstation MAX
Processor	AMD Ryzen 9 7950X	Intel Core Ultra 9 285K	AMD Ryzen Threadripper 7960X	AMD Ryzen Threadripper PRO 7995WX
RAM	128GB DDR5	192GB DDR5	512GB DDR5	512GB DDR5
GPU	RTX 4000 ADA	RTX 5000 ADA	Dual RTX 6000 ADA	RTX 4000 ADA, Three A800
Storage	4TB M.2 SSD	2TB M.2 SSD, 4TB M.2 SSD	4TB M.2 SSD, 15,36TB U.2 SSD	4TB M.2 SSD, 15,36TB U.2 SSD

Build Smarter. Train Faster. Own Your AI.

TALINO AI Workstations are purpose-built for professionals in **security, research, development, engineering, and coding**—anyone who needs the speed of the cloud with the security of local control.

Designed for high-performance AI workflows, **TALINO AI** lets you run the same powerful models used in cloud platforms, but entirely on your own hardware. No subscriptions. No risk of data leaks. Just faster results and full ownership of your work.

Whether you're analyzing surveillance footage, building AI tools, conducting scientific research, or training custom machine learning models, **TALINO AI** delivers **optimized performance, maximum flexibility, and total data privacy—right at your desk.**

High-Speed Local Processing

Accelerate your AI workflows with precision-tuned CPUs and high-end GPUs—optimized for maximum throughput and minimal latency.

Data Security Without Cloud Dependency

Your data stays local. Ideal for sensitive environments, secure facilities, and anyone prioritizing privacy and compliance.

Purpose-Built for AI & Machine Learning

From LLMs to deep learning and beyond, **TALINO AI** is optimized for demanding workloads across research, enterprise, and defense.

Faster Results, Real Productivity

Complete more iterations, train larger models, and finish projects faster—with no internet bottlenecks holding you back.

Tailored Hardware for Every Workflow

Form Factor Flexibility

Choose between a **single tower** for a streamlined footprint or a **dual-chassis** for maximum expansion.

Professional-Grade Build

Full aluminum construction improves thermal efficiency and durability.

Color Customization

Select powder-coated finishes that match your environment or brand identity.

OS Options

Preloaded with Ubuntu LTS or Windows 11 Pro—ready to go, right out of the box.

Trusted Support

Designed and supported by a team that understands mission-critical computing.
